[www.quickslide.co.uk](http://www.quickslide.co.uk)

**QUICK SLIDE**

"Thank you for considering Quickslide for your Sliding Sash Windows.

In our state-of-the-art factory in West Yorkshire our experienced tradesman are proud to manufacture products second to none and supply direct to you. Our brochure gives you some examples of the amazing windows we produce and the detail we put into every one.

I hope you see something that will enhance your property, and remember we're always here to help."

**Adrian Barraclough**  
Chairman

A photograph of a dining room. A large, multi-paned window with a wooden frame is the central focus, offering a view of a lush green landscape. The window is flanked by dark red curtains. In the foreground, a white dining table with ornate legs is set with plates, glasses, and silverware. Several white chairs with patterned upholstery are arranged around the table. A lamp with a white shade sits on a side table to the left. The floor is made of light-colored wood.

Welcome

# QUICK SLIDE

More than a decade ago Quickslide were pioneers in developing a window system that offered sash windows in PVCu. Now, nearly 500,000 windows on, the suite has evolved ever further with improvements to aesthetics, security and energy performance.

Inspired by the timber craftsmen of old, today's modern PVCu sliding sash window is the product of years of design and engineering history supported by passion for quality products "Made in Britain".

The Quickslide sash window range is designed and manufactured on a dedicated 100,000ft<sup>2</sup> site in Brighouse, West Yorkshire. Take advantage of our factory prices and have your own maintenance free PVCu sash windows direct from the manufacturer.

Made in Britain

## Why choose **Quickslide**?

Every single window is manufactured to the exact size and colour combination you require. No set or standard sizes, just what you want, when you want it.

We have an online ordering facility which allows you to design and order your window any time, any day. No salesmen or cold calling.

Our dedicated website is packed full of information. Try it for yourself – [www.quickslide.co.uk](http://www.quickslide.co.uk)

Our staff have been highly trained on every aspect of these products and are able to offer advice on specification, installation and configuration as well as answering any other queries you may have.

# Features

## Contemporary classics

At Quickslide, we have married the vintage charm of sliding sash windows with the very best hardware, including top-of-the-range operating mechanisms, which make our hand-built PVCU windows virtually indistinguishable from the timber windows they could be replacing.

### Curves in all the right places

The sculpted system was created to give the window a finish and a look of elegance rarely found with 'building products'. These curves soften the appearance of the window giving a improved aesthetic finish overall.

In addition to this, the system also offers a very slim profile sections in terms of the jambs, sash sections and mid-rail to recreate the appearance of a traditional timber sash window as closely as possible.

### Easy to clean from the inside

Not only are the windows designed to look stunning but they are also practical. The sliding sash windows are manufactured as standard with an inward opening tilt facility to allow cleaning of the glass and frame from inside the property.

Curves in all the right places

Easy to clean from the inside

# Performance with **distinctive looks**

The simple operation of two sashes within an outer frame that work independently of each other, on a balance mechanism, designed to hold each sash at any height.

## **A Multi chambered outer frame**

## **B Galvanised steel reinforced sashes**

## **C Fully concealed gaskets and weatherseals**

Gives the window a clean look, as well as improving long term weathering and thermal efficiency. Excellent weathering performance prevents the PVCu profile from degrading, bending and warping, further increased with a brush pile seal on sash edges and the outer frame.

## **D Internally glazed using 24mm Kitemarked Low E glass units**

Quickslide's vertical sliding sash windows are enhanced through the use of 'Low E' glass which will retain heat and save on energy costs.

## Secured by Design

Homeowners wanting energy efficient and authentic-looking sliding sash windows needn't compromise on security. As the UK's number one sliding sash window manufacturer Quickslide is able to supply one of the most secure windows on the market.

Awarded the highly respected 'Secured by Design' accreditation, it was devised by the Association of Chief Police Officer, to focus on crime prevention of homes and commercial premises.

Secured by Design promotes the use of security standards for a wide range of applications and products, including windows and doors.

A large photograph of a person wearing a grey hoodie and a black balaclava, looking through a window. The person is holding a black crowbar. The window frame is white, and the background outside shows green foliage and white flowers.

Security

## Upgraded features

- 1 Upgraded locking catch fixed directly in to the sash reinforcement
- 2 Upgraded locking keep fixed in to the internal beading in four places
- 3 Security blocks fitted to the top sash to stop lateral force being used to push the sash inwards
- 4 Additional reinforcement in the outer frame channels
- 5 Reinforced tilt latches to top and bottom sashes

# Thermal Performance

# Developed to achieve the **best possible thermal performance**

Quickslide's sliding sash windows are amongst the most thermally efficient available in the UK today. 'B' rated as standard with 'A' rated options available, you can be sure that your new windows will only help bring your energy costs down. Quickslide's sliding sash windows are tested in accordance with:-

Air permeability	BS EN 1026:2000
Watertightness	BS EN 1027:2000
Wind resistance	BS EN 12211:2000
Weather testing	BS EN 6375 Part 1:2009

Our sliding sash windows have gone through significant transformation over the last decade in a continuing effort to achieve the very best thermal performance.

## U-values

The glass specification is the most significant change that can be made to a window in order to affect its overall thermal efficiency. Each sliding sash window is supplied as standard with 24mm Low E double glazed units incorporating Edgetech's Superspacer bar manufactured in accordance with British Standards.

The glazing options available enable the overall window U-value to vary from 1.7W/m2K as standard to 1.4W/m2K by combining argon gas filling and soft-coat glass.

## Glazing type

■ Standard

A large, white-framed arched window is the central focus, set into a light-colored wall. The window is divided into several panes. On the windowsill, there is a vase of flowers, including a prominent red carnation and several white orchids. Two small framed photographs are also on the sill. To the right, a dark wooden staircase railing is visible. The scene is brightly lit, suggesting a sunny day. A semi-transparent purple banner is overlaid across the middle of the image, containing the text 'Bays, Flags and Arches'.

# Bays, Flags and Arches

# A window for every occasion

## Bays

An elegant, gently curved bow window or an angled bay window can make your home feel bigger and brighter. Our different bay variations can be used to replace existing bow or bay windows and can generally be installed in most properties with an accommodating aperture. Choose from our 90 degree bay options or variable angle bay option to really give your house the kerb appeal it deserves.

## Flags

Got a particularly wide window? Then why not take advantage of our 'flag window' solution? This will enable you to link multiple sliding sash windows together in various formats giving you the opportunity to create something extra special and tailored specifically for you without losing a large amount of your glass area.

## Arches

Quickslide are proud to offer their arched top sliding sash windows. The epitome of style and a delight to see first-hand, these arched top windows are manufacture in our state-of-the-art factories and bespoke to your requirements.

A photograph of a window with three panes, brown curtains, a chandelier, and a vase on the sill. The window is set in a light-colored wall. The curtains are tied back, revealing a view of a blue-roofed house. A chandelier with five lit bulbs hangs above the window. A dark, reflective vase sits on the windowsill. A white radiator is visible below the window.

# Glass Accessories

## Glazing Bar Options

Internal Fret

Astragal bar

Through time sash window styles have changed dramatically. From the multiple squares of the 'Georgian era' to the Single vertical bar of the 'Victorian period'.

No matter when in history your property dates back to, Quickslide are able to offer a solution. Today's bar options emulate the style of the period without the need for individual units of glass, making them much more thermally efficient whilst not compromising on appearance.

Available in either authentic Astragal glazing bar which are externally mounted just like real wood, or Internal fret located between the panes of glass for easy cleaning.

## Spacer Bar Colours

White

Black

With the Quickslide sliding sash window having no visible gaskets the white smooth and white wood-grain options look great with a white spacer bar.

Tailor the spacer bar colour around your frame and hardware colour choices to create the perfect overall look.

A close-up photograph of a polished brass window handle mounted on a white window frame. The handle is rectangular with a curved top and a small protrusion on the right side. The window frame is white and has a textured surface. The background is a blurred view of a stone building through the window. The lighting is bright, creating a reflection on the handle and the frame.

# Hardware

## The **finishing** touches

The hardware used on a Quickslide sliding sash window is designed to complement the window. All window hardware is available in white, gold, chrome or satin chrome.

- A Lift hooks**  
Designed to help lift the bottom sash up. These are retrospectively fitted once in-situ.
- B D-handles**  
Can be fitted internally or externally to aid in sliding the top sash downwards. Optional and supplied loose.
- C Sash locks**  
Securely keeps the top and bottom sashes locked together, supplied as standard on every window. Windows greater than 1000mm wide are fitted with two as standard.
- D Tilt buttons**  
Lateral operation to allow the window to what tilt inwards for cleaning.
- E Ring pulls**  
Optionally fitted to help pull down the top sash, supplied loose.

# Window Accessories

### Decorative sash horns

Traditional sash windows feature a sculpted timber section which acts as a stop to prevent the window from being opened too far. This was important to avoid damage to the weights and the sash itself. In PVCu manufacturing there is no requirement for the sash to perform this way. However, to match the elegant design of timber sash window we offer this as an option.

### Safety Restrictors

The purpose of these safety restrictors is to limit how far the top and bottom sashes slide up and down. Designed for child safety; the window cannot open more than 100mm.

This function can be over-riden should you need to fully open the window. However the restrictors are designed to re-engage so that you can never forget to turn them back on.

### Trickle vents

Trickle vents are located in the top sash of the sliding sash window and allow a consistent flow of air or background ventilation in to the property.

Trickle vents will help avoid problems associated with poor ventilation in naturally ventilated spaces, including: condensation, over ventilation, and excess drafts.

### Run-through sash horns

In our continuing effort to make our window indistinguishable from the original box sash windows, we have developed an alternative decorative sash horn feature.

This option replaces the 'plant on' decorative sash horn and actually incorporates the sculptured horn in to the side jamb of the top sash.

### Price

Decorative Horns (per pair)	£8
Trickle Vents	£10
Sash Restrictors (per pair)	£15
Run through horn (per pair)	£33
